SUMMARY

UI/UX Designer with **Computer Engineering** background, focused on designing complex web-based systems, dashboards and multi-product platforms. Experienced in improving usability through structured design systems, user flows, and scalable UI components.

SKILLS

- **UI/UX Design** - User Research, Wireframing, Prototyping
- **Visual & Interaction Design** - Design Systems, Typography, Color Theory, Accessibility
- **Tools and Technologies** - Figma, Adobe XD, Photoshop, Illustrator, Canva, Inkscape
- **Front-End & responsive Design** - HTML, CSS, JavaScript
- **Problem-Solving & Collaboration** - User-Focused Solutions, Effective Team Communication

PROFESSIONAL EXPERIENCE

Hyberlab IT Solutions, Kathmandu (Remote)

UI/UX Designer (Intern) | February 2024 - April 2024

- Translated product requirements into wireframes and interactive prototypes, improving alignment between stakeholders and development direction
- Redesigned core UI screens using Figma and Adobe XD to improve usability, layout clarity, and design consistency across key flows

Treeleaf Technologies, Sankhamul, Kathmandu (Onsite)

UI/UX Designer (Intern) | April 2024 - July 2024

- Improved dashboard structure and information hierarchy in Treelytics to enhance readability and usability of data-heavy interfaces
- Designed and refined complex Query Builder experience, simplifying multi-step workflows into a more intuitive interaction flow

Careinfo Solutions, Maitidevi, Kathmandu (Onsite)

UI/UX Designer (Full-Time) | December 2024 - April 2025

- Designed responsive UI for multiple business and logistics web platforms including Careinfo, Theggo, and Kontract, ensuring cross-device consistency and unified user experience across products
- Collaborated with cross-functional teams to translate requirements into scalable UI components and improved user flows across products

All Screen Solutions, Tikathali, Lalitpur

UI/UX Designer (Full-Time -> Part-Time) | February 2026 - Present

- Led redesign of large-scale multi-feature systems including Mero Dokan (208 screens) and Mero Billing (489 screens), improving UI consistency through a structured design system
- Designed key product modules including landing pages, sidebar popups, and brand assets (logos, marketing materials, and print collateral) across multiple products

EDUCATION

Bachelor of Computer Engineering - Nepal Engineering College (Changunarayan, Bhaktapur)
